PROFESSIONAL SUMMARY

Full-stack developer (React, Node.js, Python) who shipped 10+ reusable UI components in production and built three independent full-stack projects from database schema to deployment. Looking to bring hands-on REST API integration and responsive-design experience to an entry-level developer role.

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, JavaScript
- **Frontend:** React.js, HTML, CSS, Bootstrap

INTERNSHIP EXPERIENCE

Web Development Intern | Internsforge

Aug 2025 – Nov 2025

- Cut UI development time for new features by building 10+ reusable React.js components adopted across the application.
- Improved cross-device usability by implementing responsive layouts, validated across mobile, tablet, and desktop breakpoints.

Data Analytics Intern | OSI Global IT Distribution Pvt. Ltd

Jul 2025 – Aug 2025

- Enabled faster, more reliable reporting by cleaning and analyzing 1,000+ records, surfacing data patterns used in business decision-making.

PROJECTS

Smart Parking & Tracking System — Flask, Python, HTML, CSS, JavaScript, SQL | [Live Demo](#) | [GitHub](#)

- Solved manual parking-slot allocation by building a real-time booking system with automated slot expiry and simulated payments, reducing double-booking conflicts through live availability tracking.
- Designed an admin dashboard for vehicle tracking and slot analytics, backed by a normalized SQL schema.

Food Donation & Management Dashboard(HungerBridge) — React.js, JavaScript, HTML, CSS, REST APIs | [Live Demo](#) | [GitHub](#)

- Developed a responsive web-based dashboard for managing food donation and distribution activities.
- Implemented user authentication and dashboard functionality to support food donation management.
- Designed an intuitive interface for managing and tracking food-related operations.

Post Management System (CRUD) — React.js, JavaScript, Vite | [Live Demo](#) | [GitHub](#)

- Delivered a production-style CRUD application integrating the JSONPlaceholder REST API, supporting real-time create, read, update, and delete flows.
- Cut duplicate UI code by building reusable, component-based architecture across the app.

Restaurant Landing Page (Le Jardin) — HTML, CSS, Bootstrap, JavaScript | [Live Demo](#) | [GitHub](#)

- Designed and developed a fully responsive restaurant landing page using HTML, CSS, JavaScript, and Bootstrap, leveraging Bootstrap's grid system for responsive layouts while implementing extensive custom CSS for unique UI design, styling, and cross-device compatibility across desktop, tablet, and mobile.
